

# Maksym Pinchuk

JavaScript Expert | Team Leader

Hi, I'm Maksym!

A dedicated Front End Team Leader with over **8 years** of experience in the tech industry, specializing in **React.js** and the full web development ecosystem. With a strong foundation in both **Front End** and **Back end** development, I've spent the last **3 years** leading a team of talented developers, focusing on creating engaging, high-performance web applications.

My approach combines a **deep technical expertise** with a passion for innovative solutions, always aiming to push the boundaries of what's possible in web development. I thrive on challenges and enjoy exploring new technologies to **enhance user experiences** and **drive business success**.

In a nutshell, I am a **problem-solver, tech enthusiast**, and **leader** committed to excellence in the digital world. You can connect with me on [LinkedIn](#) and write me at any time you like!

## Tech Skills

- React.js
- State Management
- Testing Frameworks
- Git
- Next.js
- WebSockets
- CI/CD Pipelines
- AWS S3
- JavaScript
- CSS Preprocessors
- Accessibility
- Webpack
- Node.js
- Express.js
- Docker
- SQL/NoSQL
- TypeScript
- Responsive Design
- UX/UI Principles
- Package Management
- Express.js
- Nginx
- AWS EC2
- Agile Methodologies

## Soft Skills

- Communication
- Problem-Solving
- Time Management
- Resilience
- Leadership
- Adaptability
- Critical thinking
- Creativity
- Teamwork
- Emotional Intelligence
- Conflict Resolution
- Active Listening

## English

- Reading (B2)
- Writing (B2)
- Listening (B2)
- Speaking (B2)

# Work Experience

## React.js Developer | Team Leader **Ezlo Innovation**

April 2021 - up to now | Ukraine + International

As the **Front End Team Leader** at a forward-thinking company, I spearhead the development of cutting-edge **home automation web applications**. My role is multifaceted, involving everything from **conducting interviews** and fostering **cross-team communication** to managing stakeholder relationships.

I play a crucial role in **clarifying technical details**, ensuring **flawless project execution**, and maintaining a focused and **productive team**. Through regular retrospective meetings and a commitment to a healthy work environment, I uphold our standards of **excellence**, **driving innovation** in the **smart home industry**.

Key Responsibilities:

- Technical leadership and project oversight.
- Team management and development.
- Stakeholder engagement and cross-functional collaboration.

## Full Stack Web Developer **Suimm Group**

May 2018 - March 2021 | Ukraine + US

From the outset of my career, I have served as a **Full Stack JavaScript Developer**, significantly enhancing my expertise in both **Front End** and **Back End** development, with a particular emphasis on **React.js** web applications and **Node.js** backend servers.

My responsibilities extended beyond mere code development to encompass the configuration of staging environments, an introduction to **DevOps practices**, and proficiency with **AWS services** such as **EC2, S3, Lambda, RDS, and Route53**. Moreover, I have gained experience in **team management**, including the **documentation of business requirements** and acceptance criteria.

Key Responsibilities:

- Development and refinement of existing React-based projects from inception.
- Contributing to the architecture design of applications.
- Providing support to the team.

## Java Engineer **EPAM Systems**

March 2016 - March 2017 | Ukraine + EU

My **first full-time paid** job as a developer! Launching my career in programming, I successfully completed an **internship** and subsequently joined the development team on an internal project. During this initial phase, I gained familiarity with **design patterns**, **SOLID** principles, and a broad array of technologies and tools pertinent to **J2EE**, including **Tomcat, Spring Framework, JUnit, JDBC, MySQL**, among others.

Progressing in my career, I transitioned to an international project as a **Java Developer**, focusing on a digital commerce product for **travel retailing**, specifically in the air ticket sales sector.

Key responsibilities:

- Providing overall product support and bug fixing
- Writing unit tests
- Collaborating effectively within the team

# Recently Completed Projects

## Corporate website for UA CTMS

### Client:

UA-based IT company

### Description:

The website where clinical companies list their studies and volunteers can find them to sign up.

### Position:

Full Stack Web Developer

### Responsibilities:

- Developing applications with Server-Side Rendering (SSR)
- Developing React components
- Enhancing the custom component library
- Contributing to the architectural design discussions

### Key achievement:

Introduced and deployed a **voice search** feature utilizing the [Web Speech API](#) for browsers that support it, resulting in a significant decrease of approximately 60% in the volume of paid requests to the [Google Speech-To-Text API](#).

## US Clinical Trial Management System

### Client:

US-based technology driven company

### Description:

The leading website where clinical trial companies list their studies and eager volunteers find them to sign up instantly.

### Position:

Full Stack JavaScript Developer

### Responsibilities:

- Development of Single Page Applications (SPA)
- Construction of React components following design specifications and implementing business logic
- Designing API endpoints
- Documenting REST APIs through detailed specifications
- Applying responsive design principles for web applications

### Key achievement:

Implemented patient visit management functionality for clinic appointments.

## Cryptocurrency exchange service

### Client:

US-based fintech startup

### Description:

The platform that enables customers to buy Bitcoin with cash via non-reloadable prepaid gift cards.

**Position:**

Full Stack JavaScript Developer

**Responsibilities:**

- Developing Single Page Applications (SPA)
- Designing and coding React components, incorporating business logic
- Executing responsive design strategies for web applications
- Participating in architectural planning and design
- Facilitating communication with client-side team members (CTO, project management)

**Key achievement:**

I implemented the [KYC](#) procedure for clients verification, tailored to the volume of cryptocurrency they exchange.

# Education

**Kharkiv National University of Radioelectronics****Master's degree, Computer and Information Systems Security/Information Assurance**

September 2012 - June 2018 | Ukraine

- Secure Programming
- Mobile Technology Engineering
- Theory of Distributed Information Resources, Database Protection
- Application of Projective Manifolds in Cryptography and Coding
- Accidental Substitutions in Cryptography
- Economic Feasibility of Projects
- Anti-Interference Computer Systems and Networks
- Mathematical Methods of Modeling and Processes Optimization
- Methods of Cryptanalysis
- Methods of Cryptosystems Constructing and Analysis
- Modelling and Estimation of Efficiency for Information Security Facilities
- Monitoring and Audit of Information and Communication Systems
- Basics of Scientific Research, Organization of Science and Copyright
- Pedagogy of Higher Education
- Design of Information Security Hardware
- Administration and Operation of Secure Information and Communication Systems
- Technologies of Detecting and Blocking Threats to Public Information Resources in Information and Telecommunication Systems
